A few genealogy questions

Buddy,

I have three questions:

You once told me you'd had a DNA test done. What were the results/conclusions, or what test number was it? I thought yours might be #50817 mentioned on this site, but I'm not certain:

<https://www.smithsworldwide.org/tng/smtrees.php?grouping=GRP-R-M269-88>

At the family reunion last year, I think I recall that in front of the group you briefly summarized some new genealogy information you'd uncovered. Unfortunately I don't remember the details. Do you recall that, and what it was about?

William Smith (who lived circa 1776 to circa 1869)... Do you have evidence of when he married Sarah Gamage? Or other evidence that would help to prove more definitively that Sarah is indeed the mother of William Harvey Smith (born circa 1831, died June 1st, 1899)? I'm not aware of any such documents, but I figured I should double-check with you just in case I missed something.

Thanks,
B. [REDACTED]

Yes, my DNA test number is 50817.

With family Tree DNA I had Y-DNA 111, mtDNA, and autosomal DNA Family Finder.

I have 2 matches at Y111, the same 2 at 67 markers, and 8 at 37 markers. But, have not found a paper trail to and of these.

At The family reunion last year, I told the family that I had found George Collins 1965 – 1845 in Hancock County Georgia he was the father of Henderson Collins 1792-1848. George married Sarah Betts in Delaware (at the time it was part of Maryland) and Migrated with Sarah's Father Samuel Betts with about 30 other People to Hancock

County Georgia.

We have very few sources on William Smith 1771- Deceased , However, Sara Gammage was living in the household of William Harvey Smith 1830-1899 in the 1860 Census.

I called your mother today and gave her some ID's and Passwords to pass them on to you, so you can access the records. Just don't pass this information to other web sites. I sure would appreciate any help you can give me so just correct any errors your find.

Yours

Buddy

Hey, Buddy

I talked to Mom yesterday and got the log-ins. Thanks a ton!

I'll look into George Collins further as soon as I can find the time. Thanks for the research leg-work and for sharing it.

Buddy,

I've attached two images to this email. The file named "2-18" is the front of a photograph, and "2-19" is the back.

Do you know if this is actually a photo of Sarah Elizabeth Quinn, born 1862, died 1940, who married Henderson Collins?

I'm asking because the text on the back of the photo says "Mrs. H. I. Smith." Is it just mislabeled?

Thanks,
Bryant

Buddy,

It looks like you replied to my email, but you simply copy-and-pasted what I'd already written. I don't see anything new that you've written.

Perhaps something went wrong? Were you trying to type out a response?

Thanks,
Bryant

Bryant,

I have been without power and cable since Wednesday and could not reply to your email until today.

1. My DNA kit number is 50817.
2. The photo is of Sarah Elizabeth Quinn, born 1862. Mrs. H I Smith is my mother and we lived on Heard Ave. in Macon.

Good luck and Let me know what you find.

Buddy
